Five checks you can do in a minute!

01 Tap targets

02 Contrast

03 Focus

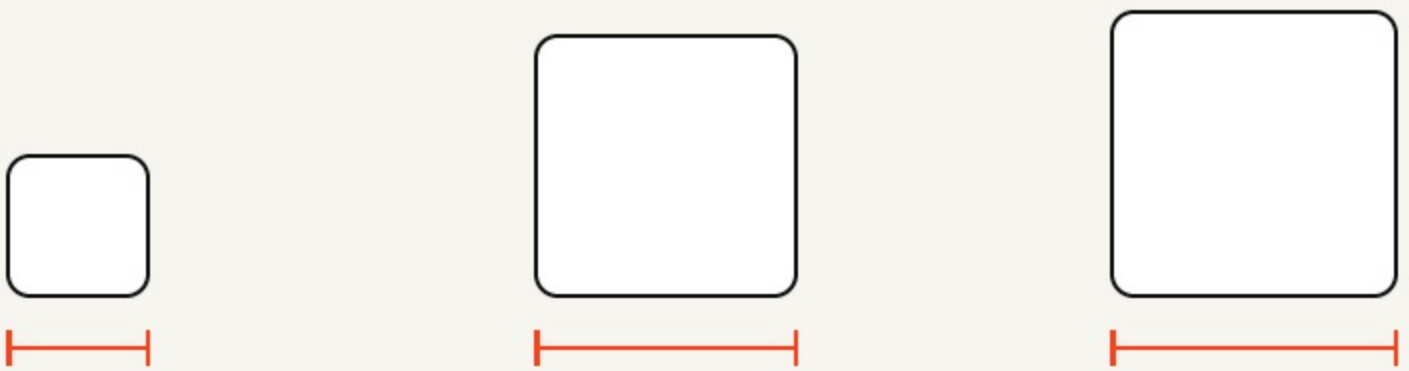

04 Line length

05 Error messages

World Usability Day, 12 November.
Swipe for each check.

Make taps easy to hit!

Shown at 3 times the size

24 px

The least WCAG 2.2 level AA allows

44 px

WCAG AAA, and Apple's advice

48 px

Material's advice, in dp

If a thumb can miss it, it will.

Give every button room, not just a look.

Text needs 4.5 to 1!

Contrast against our paper colour

Aa

16.2 : 1

Passes level AA

Our ink

Aa

4.7 : 1

Passes level AA

Our grey

Aa

2.1 : 1

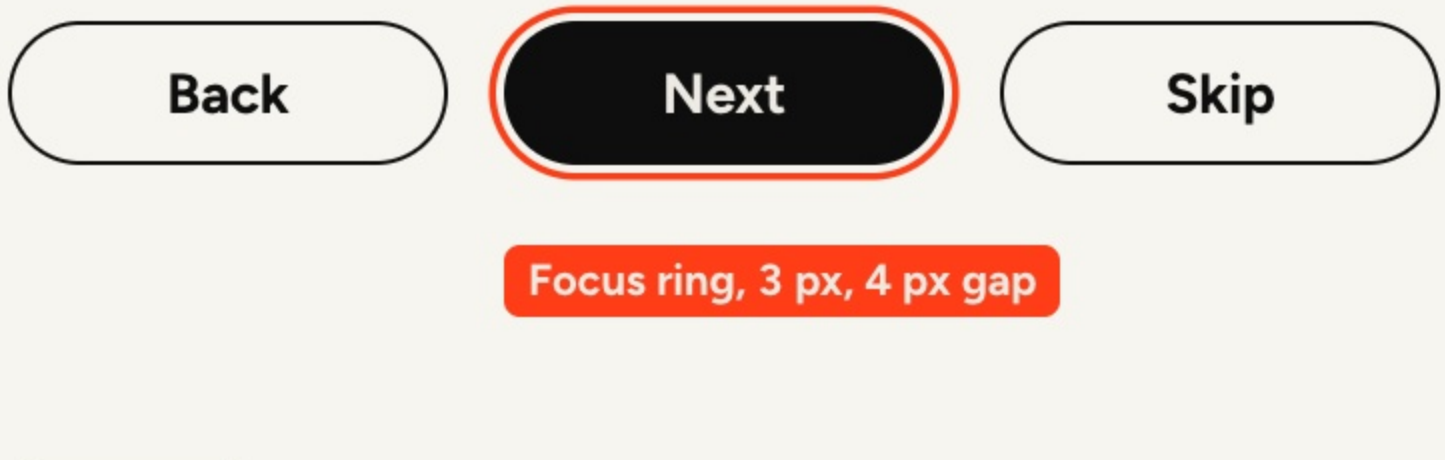

Fails level AA

A lighter grey

Squint at your own page.

Level AA asks for 4.5 to 1 on normal text.

Show where the keyboard is!

Tab Press it on any page. Can you see where you are?

Take the mouse away and tab through.

If you lose your place, so does everyone using a keyboard.

Keep lines to 45 to 75 characters!

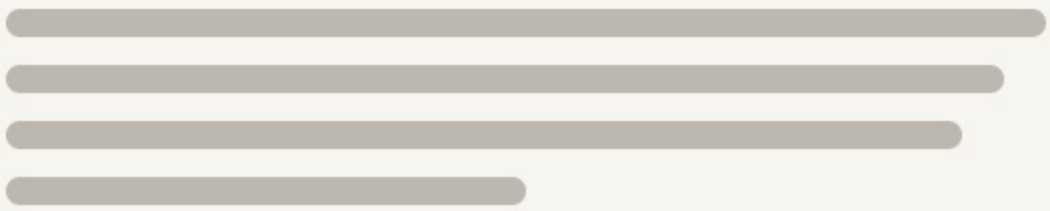

20 characters
Choppy

66 characters
Easy to follow

100 characters
You lose your place

Long lines tire the eye.
Short ones chop the sentence up. Typographers aim for about 66.

Say what went wrong, and how!

Vague

Email

name@

Invalid input.

Specific

Email

name@

Add the part after the @, like name@example.com.

An error is a small piece of writing.

Name the problem and the fix, in plain words.

Then watch someone use it!
